TOURS THROUGH THE WORLD OF SCIENCE

A General Science Text

By WILLIAM T. SKILLING

San Diego (Calif.) State Teachers College

758 pages, 5x7½, 371 illustrations, $1.70

1. It emphasizes throughout the scientific method and spirit.
2. It secures the pupils' interest from the very first page and holds it by a unique motivation device—"the fiction of travel."
3. It presents for the teacher and pupil a complete analysis of the content through its paragraph headings, carefully selected to give the gist of the thought.
4. It introduces the demonstrations and experiments immediately in connection with the topic under discussion.
5. It follows each experiment with "thought questions" to serve as a basis for oral or written discussion.
6. It prefaces each main topic with a preparation exercise designed to reveal what the pupil already knows and what information he lacks.
7. It exemplifies in every detail the modern trends in the teaching of general science.
